APPENDIX: How to apply the Apache License to your work

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Apache Flex® Trademarks

The Apache Software Foundation holds trademarks on behalf of its projects. For the Apache Flex® project these trademarks include graphical logo. Use of these marks is prohibited without explicit permission from the ASF.

However, the Apache Flex® project is happy to work with 3rd parties who desire to use these trademarks in ways that are beneficial ASF, and which are fully in conformance with Apache policies.

To request such permission, follow these steps:

- First familiarize yourself with the [Apache Trademark Policy] [1]. Many of the common cases are already addressed there. And so automatically allowed.
- Email a proposal to [private@flex.apache.org] [2]. In the proposal, please include:
  - Name and contact information of the company, organization or person requesting the permission
  - A list of what ASF controlled marks you wish to use
  - A description of how these marks would be used. Give supporting detail, along with context If you are requesting use of the logo would appear in the context of the overall design.
  - Any other information you think would be useful, e.g., any impeding deadlines
- On receipt of the proposal, the Apache Flex PMC will review and decide whether or not to recommend approval.
- If the PMC recommends approval, then they will forward their recommendation, along with your proposal and any follow up com Management for final approval.
- We will then notify you of the outcome.

About Us

Apache Flex® is a highly productive, open source application framework for building and maintaining expressive web applications that deploy consistently on all major browsers, desktops and devices (including smartphones, tablets and tv). It provides a modern, standards-based language and programming model that supports common design patterns suitable for developers from many backgrounds. Flex applications can be deployed to the ubiquitous Adobe® Flash® Player in the browser, Adobe® AIR™ on desktop and mobile or to native Android™, IOS™, QNX®, Windows® or Mac® applications.
